ABILITY SUMMARY

Some of the skills confronted throughout this line of work is scheduling, dealing with different clients and temperaments, finding ways to set an atmosphere so everyone is comfortable and performs at their best. Requires leadership but also being a listener. Delegating tasks for multiple people at a time. Strong organization skills are very important whether it be on a computer properly storing files, naming sessions, backups; or in a physical environment where cleanliness is important or handling certain gear with care. I also regularly handle

paperwork not limited to contracts, splits, riders, receipts, budgeting, etc.

I've consistently been in the Music & Entertainment industry 14yrs until present time. Started late '07 into '08 with independent record labels and since 2014 professionally under the SONY umbrella.
